PERSONAS (Ver 0)

Sohee Kang: Professor

- **~50 years old lady, female**

- **Speaks English to a fair degree**

- **Is professor at the Math and Stat department of University of Toronto; hosts lectures occasionally**

- **Aims to help ease in first year students into Statistics, and making stats intriguing and fun**

- **Isn't really familiar with computers and technology, only be able to work with Microsoft office, browse webpage and uses email applications.**

- **Has an android smartphone.**

- **Will only learn new technology if it is necessary as she is already occupied with other things.**

- **All course works from her course are assigned through Learning Portal and manually marked by her TAs. The marks are entered by TAs and she is looking for a more effective way to replace this homework process.**

- **Will carefully explain any question or concerns that the student direct to her, but does not prefer students sending her any email for questions as she has a lot of emails to go through each day.**

Stephen Hsung: Professor

- **34 years old, male**

- **Fluent in English and French**

- **Is a professor of Department of Physical & Environmental Sciences in UTSC, and he lectures few courses a semester depending on his work load**

- **Embracing new technologies and exploits them in every aspect of his work.**

- **An average of 600 students usually takes his introductory physics course.**

- **Uses WebWork to help him to distribute homework and assignments.**

- **Knows several programming languages, such as MatLab and R, to do the data analysis.**

- **Has both IOS and Android smartphone**

- **Will only allow one attempt on every assignment and homework, as he thinks that is the best reflection of his students' skills; no remark request are allowed**

- **Is suspicious about whether the student can find answers to the questions to WebWork on the internet. As a result, he also learned MathJax, and is able to modify and create his own questions on WebWork**

Desmond Poon: Student

- **19 year old, male, a student in computer science specialist program**

- **Loves video games, especially the classical ones such as Pokémon, Mario Kart, Legend of Zelda, etc.**

- **Is cautious; likes to scratch and review solutions on paper before putting them into a formal document**

- **His programing skills are good enough to create his own websites. He knows a variety of web technology, and is open to more new technology**

- **Math knowledge is below average, only takes math courses as the program requires. He does not like math**

- **Speaks fluent English and Cantonese. Knows a bit of Japanese.**

- **Very familiar with various apps such as Facebook, Google Drive, Dropbox, etc.**

- **Uses an Android smartphone**

Brian Lau: Student

- **20 years old, male, majors in math and statistic**

- **Will rather take math courses over others as elective**

- **Is lazy and always works on his assignments at the last minute; struggles in keeping up to the deadline.**

- **Proficient in dealing with numbers and doing statistical analysis.**

- **Prefers to have work that provides a challenge; normal assignment and homework is too boring for him**

- **Knows how to use Microsoft office; most proficient in Excel to process data**

- **Knows how to interact with electronic devices but does not like them in general; always carry a book with him**

- **Always complain about the time that the TAs needs to mark his assignment as it always takes a few weeks to get any feedback from the TAs in his field in general**

Ruby Hayden: TA

- **19 years old, female**

- **Enthusiastic and slightly childish personality. Wants students to get more into the field of statistics by making it more exciting and making the entry barrier a little lower**

- **Usually sits in her office doing homework or browsing YouTube. Doesn't get many students in her office, yet the marks in her tutorials aren't that great.**

- **Excellent mathematical capabilities. Is able to solve some integrals in her head**

- **Somewhat familiar with computers and technology. Can use social media apps and has some MySQL knowledge**

- **Uses an iPhone X smartphone**

- **Willing to learn new technology if she feels they are useful.**

- **Is a TA for STAB22. As a TA, she is responsible for marking and posting marks for her tutorials**
